PROFESSIONAL EXPERIENCE

SDGI Technosystem

Software Engineer

Dec 2022 – present

I managed the end-to-end process of creating web applications, from initial planning and design to development, testing, and deployment. This included outlining project requirements, writing clean and efficient code, conducting thorough unit testing to ensure application reliability, and deploying applications for live use.

MyEventz

Web Developer

Dec 2021 – Dec 2022

I provided expert troubleshooting and remediation for web applications, identifying and resolving issues to ensure optimal performance and functionality. This involved diagnosing problems, implementing fixes, and improving application stability for a seamless user experience.

Schoolnovate

Full Stack Developer

Feb 2021 – Oct 2021

Managed front-end and back-end development in the company's School Management systems. Worked with a proficient understanding of code conversion tools

ARM Web Info

Web Developer

Apr 2020 – Jan 2021

Analyzed competing websites to evaluate their content, design, and user experience, identifying trends and best practices to inform improvements in our own web applications.

PROJECTS

Tapwell e-commerce

Role : Developer & Team Lead
Team Size : 4
Framework : Next JS, Express.JS
Database : MongoDB

Requirement Description:

e-commerce platform for regular bulk product orders and management of entire business easily and its admin panel to manage products, orders, shops and reports delivery, customer, payment, reports.

Responsibility:

As a tech lead developer on an e-commerce project, I provided technical leadership and oversight for the development team, ensuring high-quality code and adherence to best practices. I designed scalable architectures and APIs, planned project phases, and collaborated with cross-functional teams for seamless integration. I mentored junior developers and tackled complex technical issues, optimizing performance and ensuring security and compliance. My role involved continuous innovation and improvement to deliver a competitive, high-quality e-commerce platform.

Flats Booking Application portal and Lead management system

Role : Developer
Team Size : 14
Framework : ReactJS, Redux, CodeIgniter, PHP
Database : MySQL

Requirement Description:

The Flats Booking Application Portal and Lead Management System is a comprehensive platform designed to facilitate the booking of flats and manage leads effectively. The system targets real estate agencies and property developers, providing them with tools to showcase available flats, manage inquiries from potential buyers or tenants, and streamline the booking process. The application aims to improve efficiency in lead management and enhance user experience for both agents and customers.

Responsibility:

As a full-stack developer working with Laravel and React.js, I contributed to both server-side and client-side development. I built and maintained scalable web applications using Laravel for backend development and React.js for frontend components. I collaborated with cross-functional teams to deliver high-quality features, maintained clean and efficient code, and conducted testing to ensure reliability. I assisted in debugging and troubleshooting issues, continuously expanded my skills, and optimized application performance.

School Management ERP

Role : Developer

Team Size : 3

Framework : HTML, CSS, JS, JQuery, Laravel, PHP

Database : MySQL

Requirement Description:

Goal of the project was to provide a management ERP, reporting and approval system of School Management. Working on the service maintenance call.

Responsibility:

As a web developer on a this project, I designed and implemented backend logic using Laravel, including controllers, models, and services. I worked with MySQL databases for efficient data management and created RESTful APIs for integration. I provided maintenance support, troubleshooting issues, and conducting testing to ensure reliability.

Leads Management

Role : Developer

Team Size : 3

Framework : HTML, CSS, JS, JQuery, Laravel, PHP

Database : Mysql

Requirement Description:

Goal of the project was to provide a Lead Nurturing Platform ERP, reporting and nurturing of leads.

Responsibility:

I developed and maintained backend logic using Laravel to handle lead tracking, scoring, and assignment. I designed and optimized MySQL database schemas for efficient data storage and retrieval. I created RESTful APIs for seamless integration with other systems and front-end applications.
